#### FOR THE QUARRY PROJECT

#### AT

## SURVEY Nos. 3/5, 11/2, 11/4, 12/6, 12/3, 12/2, 12/5, 11/3, 3/6 pt., 3/8 pt., 10/3-1, 10/4, 10/2-1, 16/3, 17/8 & 18/1 pt., 11/7 THOTTAPUZHASSERY PANCHAYAT, THIRUVALLA TALUK, PATHANAMTHITTA DISTRICT, KERALA

BY

#### PANACHAYIL INDUSTRIES, WEST OTHERA PO, THIRUVALLA, PATHANAMTHITTA, KERALA

(April, 2019 - September, 2019)

Panachayil Industries

## **INTRODUCTION**

M/s Panachayil Industries is a stone quarry located at Survey Nos. 3/5, 11/2, 11/4, 12/6, 12/3, 12/2, 12/5, 11/3, 3/6 pt., 3/8 pt., 10/3-1, 10/4, 10/2-1, 16/3, 17/8 & 18/1 pt., 11/7 Thottapuzhassery Panchayat, Thiruvalla Taluk, Pathanamthitta District, Kerala. The quarry project was accorded with the Environmental Clearance by state Environmental Impact Assessment Authority on 17-03-2018. Six month compliance reports to the conditions of the Environmental Clearance are to be submitted as part of compliance. The compliance report to the specific conditions and general conditions of the Environmental Clearance for the period of April, 2019 - September, 2019 (Third Report) is being submitted.

#### PART A - SPECIFIC CONDITIONS

#### Condition 1

At the base of the worked out pit with cliff like structure, at least 15 m buffer distance is to be provided as a no development zone as a measure of safety.

✓ Compliance

The Project team has provided 30 m buffer distance at the base of the worked out pit with cliff like structure as a measure of safety.

#### Condition 2

If any plant species endemic to Western Ghats are noticed in the area, they shall be properly protected in situ or by transplanting to an appropriate location inside the lease area.

#### ✓ Compliance

The Company properly protecting the plant species that are endemic to Western Ghats in situ or by transplanting to an appropriate location. We also maintaining a plant Nursery exclusively for the endemic species that are reported from the project site.

## PART B - GENERAL CONDITIONS

## > Condition 1

Rainwater harvesting facility should be installed as per the prevailing provisions of KMBR/KPBR unless otherwise specified.

✓ Compliance

The project team has been maintaining rainwater harvesting systems near to the project area in connection with the present quarry project,. It consists of 3 excavated pit (Pit 1, Pit 2 and Pit 3) each having the capacity of 640000, 480000 and 720000 liters respectively and one harvesting tanks constructed with stone masonry wall having the capacity of 160000 liter. Details of the rainwater harvesting system are as follows.

Sl. No.	Туре	Length (m)	Width (m)	Height (m)	Capacity (L)
1	Excavated Pit 1	20	8	4	640000
2	Excavated Pit 2	16	6	5	480000
3	Excavated Pit 3	24	10	3	720000
4	Concrete Tank	8	5	4	160000

Photograph of the rainwater harvesting system as enclosed as Annexure -

1.

## Condition 2

Environment Monitoring Cell as agreed under the affidavit filed by the proponent should be formed and made functional.

## ✓ Compliance

An Environmental Monitoring Cell has formed with Mr. Aby Mathew (Managing Partner of the Company) as head of the monitoring cell and made functional. Meeting of the monitoring cell has been arranging periodically and discus the status of the compliance of the specific and general conditions stated in the Environmental clearance order. The details of the monitoring cell members are given below.

S1. No.	Post	Name		
1	Head of the monitoring cell (Managing Partner of the Company)	Mr. Aby Mathew		
2	Head in charge (Environment)	Mr. Girish Menon		
2	Senior Environmental Officer	Dr. Rinoy Varghese		
3	Environmental Officer	Mr. Navin Xavier		
4	Name of the environmental officers in charge at Site	Mr. P. Rajeev & Mr. Girish G.R		
5	Name of the officer of Environment, Health and safety at Site	Mr. Suneesh C.S		
6	Name of the Asst. officer of Environment, Health and safety at Site	Mr. Roy K.P		
7	Name of the environmental consultant	M/s Environmental Engineers & Consultants Pvt. Ltd		
8	Address of Environmental laboratory	M/s Poluchem Laboratory Pvt. Ltd.		

## > Condition 3

Suitable avenue trees should be planted along either side of the tarred road and, open parking areas if any, including approach road and internal roads.

## ✓ Compliance

Side of the tarred road and open parking areas are almost covered by vegetation, the available areas including the sides of approach road and

other places near to the project area is planted with tree saplings. The photographs showing the same are attached as Annexure No.2.

## Condition 4

Maximum possible solar energy generation and utilization shall done at the own cost of the project proponent.

#### ✓ Compliance

In connection with the present project, solar energy device and biogas plant has installed. Solar light systems has erected in mines, crusher and magazine area. Biogas plant is associates with canteen and is using for kitchen purposes. Photographs showing solar energy devices are given in Annexure 3.

#### > Condition 5

Sprinklers shall be installed and used in the project site to contain dust emission.

#### ✓ Compliance

For the suppression of the dust generated during Crushing & Screening operation, Company has installed fixed water sprinkling systems in the Crushing units. The road system of the project site, approached road and other connected roads has been watering daily by sprinkler system installed in tipper lorry since the starting of the project. Photographs showing sprinkler system installed in the crusher unit and tipper lorry is given in Annexure 4.

#### > Condition 6

Eco-restoration including the mine closure plan shall be done at the own cost of the project proponent.

#### ✓ Compliance

Subsequent to the closure of the mine, ten percent of the excavated area will be retained as water storage area. Eco-restoration including the mine closure plan will perform at our own cost. It is proposes to develop a green belt in the remaining area after reclaimed with stacked dumping and overburden. As part of the same, we have stored the top soil and overburden in a prefixed area and started planting.

## > Condition 7

At least 10 percent out of the total excavated pit area should be retained as water storage area and the remaining area should be reclaimed with stacked dumping and overburden and planted with indigenous plant species that are eco-friendly, if no other specific condition on reclamation of pit is stipulated in the E.C.

## ✓ Compliance

Ten percent of the excavated pit area will be retained as water storage area following to the closure of the mine. It is proposes to develop a green belt in the remaining area with indigenous plant species after reclaimed with stacked dumping and overburden. Grass and Shrub species with strong root system will plant in the areas prone to erosion especially at the foot of the hill.

## > Condition 8

Corporate Social Responsibility (CSR) agreed upon by the proponent should be implemented.

## ✓ Compliance

As part of the Corporate Social Responsibility, the amount agreed by the company has been spending for various social activities.

## Condition 9

The lease area shall be fenced off with barbed wires to a minimum height of 4ft around, before starting of mining. All the boundary indicators (boards, stores, markings, etc.) shall be protected at all times and shall be conspicuous.

## ✓ Compliance

Barbed metal wire fencing has installed around the mining area with a height of 4 ft to prevent falling of animals/human/belongings/dumping of garbage's etc. All the boundary indicators (boards, stores, markings,

6

## > Condition 10

Warning alarms indicating the time of blasting (to be done at specific timings) has to be arranged as per stipulation of Explosive Department.

## ✓ Compliance

Warning alarm has installed in the project area and maintaining properly. The blasting time has fixed and is between 1.0pm and 2.0pm. A danger board indicating blasting time has installed in the project site.

## > Condition 11

Control measures on noise and vibration prescribed by KSPCB should be implemented.

## ✓ Compliance

## Noise pollution

## **Mitigation measures Implemented**

The major noise generating source from the mining activity is working machinery, drilling, blasting and plying of vehicles. The following control measures are undertaken to bring down the noise levels:-

- Proper maintenance of machinery, equipments and improvement of design of machines.
- Personal protective devices i.e., earmuffs, ear plugs etc. are provided to workers working in high noise areas.
- Maintain a wide green belt of dense foliage between mine areas and residential colonies.
- > The mining area is working only during day times.
- Noise quality is checking periodically. The sound levels are monitored through an NABL accredited laboratory during the quarry in operation and the monitored results are well within the permissible limits.

Blast vibrations and control measures

- Controlled blasting technique is adopted in this project in order to reduce blast vibrations.
- The maximum charge per delay is not more than 10kg to limit the PPV values to 10mm/sec.
- Optimum delay sequence and stem to column ratio is maintaining to minimize the ground vibration intensity.
- > Condition 12

Quarrying activities should be limited to day time as per KSPCB guidelines/specific conditions.

✓ Compliance

Quarrying activities is carrying out only during day time.

Condition 13

Blasting should be in a controlled manner as specified by the regulations of Explosive department or any other concerned agency.

✓ Compliance

## Blasting

- The controlled blasting is proposed by adopting all the safety measures as per "MMR 1961" and with the permission of DGMS.
- Blasting is carried out for the fragmentation of the granite within the project area. Multiple blast holes of 1.0 to 1.5 m depth will be drilled with the help of 32mm drill rod, Jack Hammer and air compressor of 100 cm capacity.
- It is estimated about 250g of explosives per hole is required. About 30-50 holes per blast are proposed. Therefore the requirement of explosive will be about 10kg/ blast.

## Blasting safeguard

- Slasting in the open cast is done only during day time at designated hours.
- Only competent blasters are appointed to handle explosives.

- Explosives are stored in approved and licensed magazine as per explosive Act/ Rules.
- Explosives are brought from magazine to blasting site in licensed explosive van under the care of blaster.
- Sufficient warning signals are given before blasting the holes.
- Guards are posted on all roads and paths at least 250 m distance to stop entrance to the danger zone during the blasting hour.
- Controlled blasting is practiced to control vibrations and flying fragments.
- Optimum charge is used, while blasting near office complex/ infrastructure site.
- Maximum charge per delay is always being less than 10kg to limit the PPV levels within the DGMS standards of 15 mm/sec.
- > Condition 14

A licensed person should supervise/ control the blasting operations.

✓ Compliance

Licensed person is supervising the blasting operations. Copy of the License is attached as Annexure 6.

## > Condition 15

Access road to the quarry shall be tarred to contain dust emissions that may arise during transportation of materials.

✓ Compliance

Entree road to the quarry has tarred and maintaining well to contain dust emissions that may arise during transportation of materials. The photographs showing the same is enclosed as Annexure 7.

## > Condition 16

Overburden materials should be managed within the site and used for reclamation of mine pit as per mine closure plan/ specific condition.

#### ✓ Compliance

The company have been storing top soil and overburden in a prefixed location for the reclamation of mine pit as per mine closure plan/EC conditions. Photographs showing the top soil dump is attached as Annexure 8.

## Condition 17

Height of the benches should not exceed 5m, and width should not be less than 5m, if there is no mention is the mining plan/ specific condition.

#### ✓ Compliance

Mining operation is carrying out in the system of benches. The suggested height and width of the benches are maintaining. The photograph showing the bench type mining is enclosed as Annexure 9.

#### > Condition 18

Mats to reduce fly rock blast to a maximum of 10 PPV should be provided.

✓ Compliance

Mats to prevent fly rock during blasting has provided. Several other safety measures are also practicing to prevent fly rocks cross the lease area. Blasting during unfavorable weather conditions has avoided. Maintain optimum delay sequence and stem to column ratio to minimize the fly rock distance.

#### **Condition 19**

Maximum depth of mining from general ground level at site shall not exceed 10 m.

#### ✓ Compliance

Regarding the current Mining project, the exploitation of mineral is from 150-40m MSL in conceptual phase. Mining depth will not exceed beyond 10m from general ground level.

#### > Condition 20

No mining operation should be carried out at places having a slope greater than 45.

#### ✓ Compliance

Mining activities is carrying out only at regions having a slope greater than 45°.

#### > Condition 21

Acoustic enclosures should have been provided to reduce sound amplifications in addition to the provisions of green belt and hollow brick envelop for crushers, so that the noise level is kept within prescribed standards given by CPCB/KSPCB.

#### ✓ Compliance

The entire project area has covered by thick green belt and this will reduce sound amplifications produced during mining activities. Crusher unit has covered by thick Green belt and metal sheet covering is also fixed. Through all this, the noise level will be limited within the prescribed standards given by CPCB/KSPCB. Photograph showing the crusher unit covered by green belt and metal sheet covering is attached as Annexure 10.

#### > Condition 22

The workers on the site should be provided with the required protective equipment such as ear muffs, helmets, etc.

#### ✓ Compliance

The Company has provided personal protective devices such as earmuffs, ear plugs, helmet etc. to the workers have at the site. Blasting shelters are also arranged in the mining site.

#### > Condition 23

Garland drains with clarifiers to be provided in the lower slopes around the core area to channelize storm water.

#### ✓ Compliance

For the present project, an abandoned pit is using as storm water pond and the storm water from the entire lease area is channelizing in to it and stored the storm water in it. During this storage all the debris/slit in the storm water will be sedimented in to the bottom of the pit. Sediment from the storm water pond has removed periodically. Photograph showing storm water pond is attached as Annexure 11.

## > Condition 24

The transportation of minerals should be done in covered trucks to contain dust emissions.

## ✓ Compliance

All trucks are covered with tarpaulin sheets after loading to control dust emissions during transportation. Moreover trucks are not overloading and the loads are maintained to the body level. Photograph showing the loaded trucks covered with tarpaulin sheets is attached as Annexure 12.

## > Condition 25

The proponent should plant at least 5 times of the loss that has been occurred while clearing the land for the project.

✓ Compliance

The Project team is planting trees 5 times of the loss that has been occurred while clearing the land for the project. Most of the land in the present EC area are already under mining. Thus the loss of plants are very negligible in connection with the present project.

## > Condition 26

Disposal of spent oil from diesel engines should be as specified under relevant rules/regulations.

## ✓ Compliance

Disposal of spent oil from diesel engines is carrying out under relevant rules/regulations.

## > Condition 27

Explosive should be stored in magazines in isolated place specified and approved by the Explosive Department.

Explosives are storing in magazines built in an isolated place specified and approved by the Explosives Department. Photograph showing the Explosive magazines constructed in isolated place is attached as Annexure 13.

## Condition 28

A minimum distance of 100 m from the boundary of the quarry to the nearest dwelling unit or other structures, not being any facility for mining shall be provided.

## ✓ Compliance

Distance of 100m from the boundary of the quarry to the nearest dwelling unit or other structures has provided.

## Condition 29

100 m buffer distance should be maintained from forest boundaries.

## ✓ Compliance

## There is no forest area adjacent to the project area

## Condition 30

Consent from Kerala State Pollution Control Board under Water and Air Act(s) should be obtained before initiating mining activity.

## ✓ Compliance

Consent from Kerala State Pollution Control Board under Water and Air Act(s) has obtained. Consent Order from Kerala State Pollution Control Board is attached as Annexure 14.

## > Condition 31

All other statutory clearances should be obtained as applicable by project proponents from the respective competent authorities including that blasting and storage of explosives.

## ✓ Compliance

All statutory approvals required for the quarrying activity is obtained for the project. The details regarding the same along with the copy of the statutory approvals are enclosed as Annexure 15 and 16. Details of statutory approvals are given below.

S1. No.	Annexure	Statutory approvals
1	15	License from Panchayat
2	16	License to possess: (c) for use, explosives of class1, 2, 3, 4, 5, 6 or 7.

## > Condition 32

In the case of any change(s) in the scope of the project, extent quantity, process of mining technology involved or in any way affecting the environmental parameters/impacts are assessed, based on which only the E.C. is issued, the project would require a fresh appraisal by this Authority for which the proponent shall apply and get the approval of this authority.

## ✓ Compliance

## Would be complied

## > Condition 33

The Authority reserves the right to add additional safeguard measures subsequently if found necessary, and to take action including revoking of the environmental clearance under the provisions of the Environmental (Protection) Act, 1986 to ensure effective implementation of the suggested safeguard measures in a time bound and satisfactory manner.

## ✓ Compliance

## Would be complied

## > Condition 34

The stipulation by the statutory authorities under different acts and notifications should be complied with including the Water (Prevention and

Control of Pollution) Act 1974, The Air (Prevention and Control of Pollution) Act, 1981, The Environment (Protection) Act, 1986, the Public Liability (Insurance) Act, 1991 and EIA Notification 2006.

#### ✓ Compliance

#### Would be complied

#### > Condition 35

The project Proponent should advertise in at least two local newspapers widely circulated in the region one of which (both the advertisement and the newspaper) shall be in the vernacular language informing that the project has been accorded Environmental Clearance and copies of clearance letters are available with the State Environmental Impact Assessment Authority (SEIAA) office and may also be seen on the website of the Authority at <u>www.seiaa.kerala.org</u>. The advertisement should be made within 10 days from the date of receipt of the clearance letter and the copy of the same signed in all pages should be forwarded to the office of the Authority as confirmation.

#### ✓ Compliance

Regarding the accordance of environmental clearance to the quarrying activity has advertised in two local newspapers and the copy of the same was submitted to SEIAA Kerala. The copies of the advertisements are provided at Annexure 11 & 12. Details of the newspaper advertisements are given below.

S1. No.	Annexure	Name of the Newspaper and edition	Dated
1	17	New Indian Express	29/03/2018
2	18	Mathrubhumi	29/03/2018

#### > Condition 36

A copy of the clearance letter shall be send by the proponent to concerned Grama panchayat/ District panchayat/ Muncipality/ Corporation/ Urban local body and also to the Local NGO if any, from whom suggestions/ representations if any, were received while processing the proposal. The Environmental Clearance shall also be put on the website of the company by the proponent.

#### ✓ Compliance

A copy of the environmental clearance order was submitted to the Panchayat office. The acknowledgement received is provided at Annexure 19. There is no suggestion/representation received so far from anybody. The environmental clearance order is uploaded in the website of the company and can be seen in the website www.msand.in

#### > Condition 37

The proponent shall submit half yearly reports on the status of compliance of the stipulated E.C. conditions including results of monitored data (both in hard copies as well as by e- mail) and upload the status of compliance of the stipulated E.C. conditions, including result of monitored data on website and shall update the same periodically. It shall simultaneously be send to the respective Regional office, of MOEF, Govt. of India and also to the State Environmental Impact Assessment Authority (SEIAA) office.

#### ✓ Compliance

Third compliance report is being submitted to SEIAA, Department of Environment and Climate change, Govt. of Kerala and Regional Office of MoEF, Govt. of India both in hard copy as well as soft copy (CD).

#### > Condition 38

The details of environmental clearance should be prominently displayed in a metallic board of 3ft x 3ft with green background and yellow letters of Times New Roman font of size of not less than 40. Sign board with extent of lease area and boundaries shall be depicted at the entrance of the quarry visible to the public.

#### ✓ Compliance

Details of the environmental clearance prominently displayed in a metallic board of 3 ft x 3 ft with green background and yellow letters of Times New Roman fond has installed. Photograph showing the same is attached as Annexure 20

#### > Condition 39

The proponent should provide notarized affidavit (indicating the number and date of environmental clearance proceedings) that all the conditions stipulated in the E.C. shall be scrupulously followed.

#### ✓ Compliance

An affidavit stating that all the conditions stipulated in the Environmental clearance will be scrupulously followed has submitted to Department of Environment and climate change and the copy of the same is attached at Annexure 21.

#### Condition 40

No change in mining technology and scope of work should be made without prior approval of the SEIAA, No further expansion or modifications in the mines shall be carried out without prior approval of the SEIAA, as applicable.

#### ✓ Compliance

We will not make any change in mining technology and scope of work without prior approval of the SEIAA and further expansion or modifications in the mines will not be carried out without prior approval of the SEIAA.

#### > Condition 41

The project proponent shall ensure that no natural water course and/or water recourses shall be obstructed due to any mining operations. Necessary safe guard measures to protect the first order streams if any, originated from the mine lease shall be taken.

#### ✓ Compliance

We ensure that no natural water course and/or water recourses has not obstructed due to any mining operations. There is no first order streams originated from the mine lease.

#### > Condition 42

Monitoring of Ambient Air Quality to be carried out based on the notification 2009, as amended from the time to time by the Central Pollution Control Board. Water sprinkling should be increased at places loading and unloading points and transfer points to reduce fugitive emission.

#### ✓ Compliance

We are carrying out monitoring of Ambient Air Quality based on the notification 2009, as amended from the time to time by the Central Pollution Control Board. Water sprinklers has installed at places such as loading and unloading points and transfer points to reduce fugitive emission.

#### > Condition 43

The top soil, if any, shall be temporarily be stored at earmarked site(s) only for the top soil shall be used for land reclamation and plantation. The overburden generated during the mining operation shall be stacked at earmarked dump site(s) only. The maximum height of the dump shall not exceed 8m and width 20m and overall slope of the dump shall be maintained to 45°. The O.B. dump should be scientifically vegetated with suitable native species to prevent erosion and surface run off. In critical areas, use of geo textiles shall be undertaken for the stabilization of the dump. The entire excavated area shall be backfilled. Monitoring and management of rehabilitated area should continue until the vegetation become selfsustaining.

#### ✓ Compliance

The project team has earmarked the area for dumping the overburden generated during the mining operation. The maximum height of the

dump are maintaining below 8m and width 20m and overall slope of the dump are maintaining to 45°. The O.B. dump are scientifically vegetating with suitable native species to prevent erosion and surface run off. In critical areas, we will use geo textiles undertaken for the stabilization of the dump. The entire excavated area will be backfilled. We are also monitoring and managing the rehabilitated area until the vegetation become self-sustaining.

#### > Condition 44

Catch drains and siltation ponds of appropriate site shall be constructed around the mine working mineral and O.B. dumps to prevent runoff water and flow of sediments directly into the river and other water bodies. The water so collected should be utilized for watering the mine area, roads, green belt development etc. The drains shall be regularly desilted particularly after monsoon and maintained properly.

#### ✓ Compliance

Catch drains and siltation ponds of appropriate site has constructed around the mine working, mineral and O.B. dumps to prevent runoff water and flow of sediments directly into the river and other water bodies. The water so collected are using for watering the mine area, roads, green belt development etc. The drains are regularly desilting particularly after monsoon and maintained properly.

#### Condition 45

Effective safe guard measures such as regular water sprinkling shall be carried out in critical areas porn to air pollution and having high levels of  $PM_{10}$  and  $PM_{25}$  such as haul road loading and uploading points and transfer points. It shall be ensure that the Ambient Air Quality Parameters conform to the norms prescribed by the Central Pollution Control Board in this regard.

#### ✓ Compliance

Effective safe guard measures such as regular water sprinkling are carrying out in critical areas porn to air pollution and having high levels

of PM<sub>10</sub> and PM<sub>25</sub> such as haul road loading and uploading points and transfer points. It is ensuring that the Ambient Air Quality Parameters conform to the norms prescribed by the Central Pollution Control Board in this regard.

## > Condition 46

Fugitive dust emission from all the sources should be controlled regularly. Water spraying arrangements on haul roads, loading and unloading at transfer points. Should be provided and properly maintained.

## ✓ Compliance

Fugitive dust emission from all the sources are controlling regularly. Water spraying arrangements on haul roads, loading and unloading at transfer points has arranged and properly maintained.

## Condition 47

Measures should be taken for the control of Noise level below 85 DBA in the work environment.

## ✓ Compliance

Different measures are taking for the control of noise level below 85 DBA in the work environment. We are also checking the Ambient Sound level periodically.

## > Condition 48

A separate Environment Management Cell with suitable qualified personal should be setup under the control of a senior executive who will directly report to the head of the organization.

## ✓ Compliance

A separate Environment Management Cell with suitable qualified personal has formed under the control of a senior executive who will directly report to the head of the organization. All the environment management plans are monitored by this cell.

## > Condition 49

The funds earmarked for the Environmental protection measures and CSR activities should be kept in separate account and should not be diverted for other purpose. Year wise expenditure should be reported to the State Environmental Impact Assessment Authority (SEIAA) office.

#### ✓ Compliance

The funds earmarked for the Environmental protection measures and CSR activities will not diverted for other purpose. We will reports year wise expenditure of CSR and Environmental protection measures to the State Environmental Impact Assessment Authority (SEIAA) office.

#### > Condition 50

The regional office of MOEF and CC located at Bangalore shall monitor compliance of the stipulated conditions. The project Authorities should extent full co-operation to the officer (s) of the regional office by furnishing the requisite data/information/monitoring reports.

#### ✓ Compliance

We will extent full co-operation to the MOEF officer (s) of the regional office by furnishing the requisite data/information/monitoring reports.

#### > Condition 51

Any appeal against the Environmental Clearance shall lie with the National Green Tribunal, if preferred within a period of 30 days as prescribed under section 16 of the National Green Tribunal Act, 2010.

#### ✓ Compliance

There is no appeal against this Environmental Clearance with the National Green Tribunal.

#### > Condition 52

Concealing the factual data or submission of false/fabricated data and failure to comply with any of the conditions mentioned above may result in the withdrawal of this clearance and attract action under the provision of Environmental Protection Act, 1986.

## ✓ Compliance

## We agreed

## > Condition 53

The SEIAA may revoke, or suspend the order for non-implementation of any of the specific or this implementation of any of the conditions is not satisfactory. The SEIAA reserves the right to alter/modify the above conditions or stipulate any further conditions or stipulate any further conditions in the interest of Environmental Protection.

## ✓ Compliance

## We agreed

## > Condition 54

The above conditions shall prevail not withstanding anything to the contrary in consistent or simplified, contained in any other permit, license on consent given by any other authority for any other project.

## ✓ Compliance

## We agreed

## > Condition 55

The order is valid for a period of 5 years or the expiry date of mining lease period issued by the Government of Kerala, whichever is earlier.

## ✓ Compliance

## We agreed

## > Condition 56

The Environmental Clearance will be subject to the final order of the courts in any pending litigation related to the land or project, in any court of law.

## ✓ Compliance

There is no pending litigation related to the land or project, in any court of law regarding this project.

22

## > Condition 57

The mining operation shall restrict to above ground water table and it should not intersect ground water table.

#### ✓ Compliance

We are carrying out mining activity above the ground water table only and it will not intersect ground water table.

#### > Condition 58

All vehicles used for transportation and within the mine shall have 'PUC' certificate from authorized pollution taking center. Washing of all vehicles shall be in the lease area.

#### ✓ Compliance

All vehicles using for the transportation within the mine have obtained 'PUC' certificate from authorized pollution taking center and all the vehicles are washing within in the lease area only.

#### > Condition 59

Project proponent should obtain necessary prior permission of the competent authorities for withdrawal of requisite quantity of surface water and ground water for the project.

#### ✓ Compliance

# At present we are using harvested rainwater only for the present quarry project.

#### > Condition 60

Regular monitoring of flow rates and water quality upstream and down streams of the spring and perennial nallahs flowing in and around the mining lease area shall be carried out and reported in the six monthly reports to the SEIAA.

#### ✓ Compliance

There is no spring and perennial nallahs flowing in and around the mining lease area.

## > Condition 61

Occupational Health surveillance programme of the workers should be under taken periodically to observe any contractions due to exposure to dust and take corrective measures if needed.

## ✓ Compliance

The project team are carrying out the Occupational Health surveillance programme of our workers periodically to observe any contractions due to exposure to dust and take corrective measures if needed in connection with Mines Vocational Training.
