TO  
THE CONDITIONS  
OF**

**ENVIRONMENTAL CLEARANCE ORDER**

**NO: 49/SEIAA/KL/7178/2012**

**Dated 23-08-2013**

**BY**

**STATE ENVIRONMENT IMPACT ASSESSMENT AUTHORITY (SEIAA)**

**FOR THE  
QUARRY PROJECT  
AT**

**Survey Nos. 373/1, 373/2, 378/2-2, 372/1-2 and 164/1-187, AYYAMPUZHA VILLAGE  
AND PANCHAYAT, ALUVA TALUK, ERNAKULAM DISTRICT, KERALA**

**BY**

**POABS GRANITE PRODUCTS PRIVATE LIMITED  
KUTTOOR P.O., THIRUVALLA, PATHANAMTHITTA - 689106**

**(September, 2015 – February, 2016)**

### **INTRODUCTION**

M/s Poabs Granite Products Pvt. Ltd. is a stone quarry situated at Survey Nos. **373/1, 373/2, 378/2-2, 372/1-2** and **164/1-187**, Ayyampuzha Village and Panchayat, Aluva Taluk, Ernakulam District, Kerala. The quarry project was accorded with environmental clearance by State Environmental Impact Assessment Authority on 23-08-2013. Six month compliance report to the conditions of the environmental clearance is to be submitted as part of compliance. The compliance report to the specific and general conditions of the environmental clearance for the period of September, 2015 – February, 2016 is being submitted.

### **PART - A – SPECIFIC CONDITIONS**

#### **➤ Condition 1)**

The transportation of minerals should be done in covered tucks to contain dust emissions.

#### **Compliance**

**After loading trucks are covered with tarpaulin sheets to control dust emissions during transportation. Trucks are not overloading and the loads are maintained to the body level. Photographs showing the loaded trucks covered with tarpaulin sheets at the sites are given in Annexure No. 1.**

#### **➤ Condition 2)**

PPV to be kept below 10 mm/sec for the safety of nearby dwelling units.

#### **Compliance**

**Highest charge per delay is maintained below 10kg to limit the PPV values within 10mm/sec.**

#### **➤ Condition 3)**

Fly rock should not cross the lease area.

#### **Compliance**

**Distinctive safety measures were set down to avoid fly rocks cross the lease area. Blasting during unfavorable weather conditions is avoided. Keep optimum delay sequence and stem to column ratio to minimize the fly rock distance.**

## ***Fifth Compliance Report***

---

### **Condition 4)**

Spent oil from DG sets should be disposed off as per Hazardous Waste (Management & Handling) rules and send to stores for disposal through authorized agents.

### **Compliance**

**Spent oil from DG sets is reused.**

#### **➤ Condition 5)**

Amount should be earmarked for CSR components as per the provisions of Companies Bill, 2011.

### **Compliance**

**As part of the Corporate Social Responsibility, the amount proposed by the company is spending for various social activities. CSR Register is maintaining**

#### **➤ Condition 6)**

Consent from the abutting property owners must be obtained prior to starting the mining operations.

### **Compliance**

**Most of the abutting properties of the mining area within 100m radius owned by company itself.**

### **Condition 7)**

The space provided for stacking the overburden proposed in the slope should be relocated to a lower elevation.

### **Compliance**

**Area provided for stacking the overburden planned in the slope was relocated to a lower elevation and the photograph showing the relocated area and stacked overburden are enclosed as Annexure 2.**

#### **➤ Condition 8)**

The existing GT station in the site should be preserved.

### **Compliance**

**There is no existing GT station within the project area will be preserved.**

## ***Fifth Compliance Report***

---

### **➤ Condition 9)**

Conducting the mining operations in the entire area under possession as one block including the existing one, since fragmenting the project causes unplanned quarrying with loss of extractable reserves.

#### **Compliance**

**Mining operation is conducting in the entire area as one block.**

### **➤ Condition 10)**

The original conceptual mining plan should be revised and mining operations executed as per the revised plan approved by SEAC.

#### **Compliance**

**The original conceptual mining plan is revised and mining operations executed as per the revised plan approved by SEAC.**

### **➤ Condition 11)**

Arrangements must be made to provide adequate safe drinking water to all project workers.

#### **Compliance**

**Water demand for the project is around 4KLD every day and the water demand being met from rain water. Drinking water for project workers are provided from rain water harvesting system and the quality of drinking water is periodically analyzed by accredited laboratories (Polluchem Laboratories (P) LTD). The copy of the water quality report is given in Annexure 3. Separate water treatment systems are installed in the canteen and project site. Combined UV and Cartridge filter System is provided in the canteen and Pre filter system is installed in the Project site. Photograph showing the filter systems are enclosed as Annexure 4.**

### **PART – B – GENERAL CONDITIONS**

### **➤ Condition 1)**

Rain water harvesting to collect and utilize the entire water falling in land area should be provided.

## ***Fifth Compliance Report***

---

### **Compliance**

Rain water harvesting systems are provided in the project site. Two excavated pit (Pit 1 and Pit 2) and one concrete tank are using as rainwater harvesting system having the capacity of 2700000, 1800000 and 80000 liters respectively. Photograph showing the same is enclosed as Annexure A. Details of the rainwater harvesting systems are as follows.

<b>Sl. No.</b>	<b>Type</b>	<b>Length (m)</b>	<b>Width (m)</b>	<b>Height (m)</b>	<b>Capacity (L)</b>
1	Excavated mine pit 1	30	15	6	2700000
2	Excavated mine pit 2	25	12	6	1800000
3	Concrete tank	10	4	2	80000

#### **➤ Condition 2)**

Environment monitoring cell as agreed under the affidavit filed by the proponent should be formed and made functional.

### **Compliance**

An environmental monitoring cell was formed with Mr. Joseph Jacob (Managing Director of the Company) as head of the monitoring cell. Meeting of monitoring cell is arranging monthly and discuss the status of the compliance of the specific and general conditions stated in the Environmental clearance order. The details of the monitoring cell members are given below.

<b>Sl. No.</b>	<b>Post</b>	<b>Name</b>
1	Head of the monitoring cell (Managing Director of the Company)	<b>Mr. Joseph Jacob</b>
2	Head in charge (Environment)	Mr. VT Thomas
3	Senior Environmental Officer	Mr. Rinoy Varghese
4	Environmental Officer	Mr. Navin Xavier
5	Name of the environmental officer in charge at site	Mr. Thomas Abraham T
6	Name of the officer Environment, Health and safety at site.	Mr. Hemanth

## ***Fifth Compliance Report***

---

7	Name of the Asst. officer of Environment, Health and safety at site	Mr. Ratheesh Kumar G
8	Name of the environmental consultant	M/s Enkay Enviro Services Pvt. Ltd. & M/s Environmental Engineers & Consultants Pvt. Ltd
9	Address of Environmental laboratory	M/s Poluchem Laboratory Pvt. Ltd.

### **➤ Condition 3)**

Suitable avenue trees should be planted along either side of the tarred road and open parking areas, if any, inclusive of approach road and internal roads.

#### **Compliance**

**There is natural vegetation including trees and shrubs in the sides of tarred road and parking areas. We planted the area with less vegetation by tree saplings and the photograph showing the same is given in Annexure B. Details of the tree species planted as follows.**

SI No.	Scientific Name	Common Name	Family
1	<i>Cassia fistula</i> L.	Indian Laburnum/Kanikkonna	Fabaceae
2	<i>Mangifera indica</i> L.	Mango tree/Mavu	Anacardiaceae
3	<i>Bambusa vulgaris</i> Schrad.	Golden Bamboo/ Manjamula	Poaceae
4	<i>Phyllanthus emblica</i> L.	Indian Gooseberry/Nelli	Phyllanthaceae

### **➤ Condition 4)**

The project shall incorporate devices for solar energy generation and utilization wherever possible.

#### **Compliance**

**Solar energy devices will be installed within the project area shortly.**

### **➤ Condition 5)**

Sprinklers shall be installed and used in the project site to contain dust emissions

#### **Compliance**

**Fixed Water Sprinkling System is installed along the road sides of the project area. The road system without sprinklers is periodically watered by sprinkler system installed in tipper lorry. Crushing units are also fitted with Sprinkling System to**

## ***Fifth Compliance Report***

---

suppress dust generated during Crushing & Screening operation. Photograph showing the same is enclosed as Annexure C and Ca.

➤ **Condition 6)**

The eco-restoration plan submitted with the proposal should be fully implemented.

### **Compliance**

**Following the closure of the mine, ten percent of the excavated pit area will be maintained as water storage area. It is proposed to develop a green belt in the remaining area after reclaimed with stacked dumping and overburden.**

➤ **Condition 7)**

At least 10 percent of the excavated pit area should be retained as water storage areas and the remaining area should be reclaimed with stacked dumping and overburden and planted with indigenous plant species that are eco-friendly.

### **Compliance**

**After the closure of the mine, ten percent of the excavated pit area will have retained as water storage area. It is proposed to develop a green belt in the remaining area with indigenous plant species after reclaimed with stacked dumping and overburden. Grass and Shrub species with strong root system will be planted in the areas prone to erosion especially at the foot of the hill. List of selected indigenous plants for green belt development is given below.**

<b>SI No.</b>	<b>Scientific Name</b>	<b>Common Name</b>	<b>Family</b>
1	<i>Cassia fistula</i> L.	Indian Laburnum/ Kanikkonna	Fabaceae
2	<i>Mangifera indica</i> L.	Mango tree/ Mavu	Anacardiaceae
3	<i>Mimusops elengi</i> L.	Spanish Cherry/ Elanji	Sapotaceae
4	<i>Phyllanthus emblica</i> L.	Indian Gooseberry/ Nelli	Phyllanthaceae
5	<i>Syzygium cumini</i> (L.) Skeels	Black Plum	Myrtaceae

➤ **Condition 8)**

Rain water harvesting capacity should be installed as per the prevailing provisions of KMBR/KPBR.

## ***Fifth Compliance Report***

---

### **Compliance**

The present project consists of an area of 4.8367 hectare and the entire project requires close to 5,500 liters of water per day. Two excavated pit (Pit 1 and Pit 2) and one concrete tank are using as rainwater harvesting system having the capacity of 2700000, 1800000 and 80000 liters respectively. The pits can store water for all the years, and makes the company self-sufficient in its water needs. Since the bottom and walls of the pits are hard rock which prevents water from seeping into the ground.

➤ **Condition 9)**

Corporate Social Responsibility agreed upon by the proponent should be implemented in tune with the conditions specified in Companies Bill, 2011.

### **Compliance**

**As part of the Corporate Social Responsibility, the amount proposed by the company is spending for various social activities.**

➤ **Condition 10)**

Barbed metal wire fencing around the mining area shall be provided with a height of not less than 5 ft so that the falling of animals/human/belongings/dumping of garbage's etc. does not happen.

### **Compliance**

**Barbed metal wire fencing is installed around the mining area with a height of 5 ft to prevent falling of animals/human/belongings/dumping of garbage's etc.**

➤ **Condition 11)**

Warning alarms indicating the time of blasting (to be done at specific timings) has to be arranged as per stipulations of explosive department.

### **Compliance**

**Warning alarms are installed in the project area and maitaing properly. The blasting time is fixed and is between 5.30pm and 6.0pm. A danger board with blasting time is installed in the project site. The photographs showing the danger board as enclosed as Annexure C0.**

## ***Fifth Compliance Report***

---

### **➤ Condition 12)**

Controlled measures on noise and vibration prescribed by KSPCB should be implemented.

#### **Compliance**

#### **Noise pollution**

#### **Mitigation measures Implemented**

The major noise generating source from the mining activity is working machinery, drilling, blasting and plying of vehicles. The following control measures are undertaken to bring down the noise levels:-

- Proper maintenance of machinery, equipments and improvement of design of machines.
- Personal protective devices i.e., earmuffs, ear plugs etc. are provided to workers working in high noise areas.
- Maintain a wide green belt of dense foliage between mine areas and residential colonies.
- The mining area is working only during day times.
- Noise quality is checked periodically. The sound levels are monitored through an NABL accredited laboratory during the quarry in operation and the monitored results are well within the permissible limits. The copy of the ambient noise monitoring report is enclosed as Annexure No. C1.

#### **Blast vibrations and control measures**

- ❖ Controlled blasting technique is adopted in this project in order to reduce blast vibrations.
- ❖ The maximum charge per delay is not more than 10kg to limit the PPV values to 10mm/sec.
- ❖ Optimum delay sequence and stem to column ratio is maintained to minimize the ground vibration intensity.

### **➤ Condition 13)**

Quarrying activities should be limited to daytime as per KSPCB guidelines.

#### **Compliance**

**Quarry is running only during day time.**

## ***Fifth Compliance Report***

---

### **➤ Condition 14)**

Blasting should be done in controlled manner as specified by the regulations of explosives department or any other concerned agency.

### **Compliance**

#### **Blasting**

- ❖ **The controlled blasting is proposed by adopting all the safety measures as per “MMR 1961” and with the permission of DGMS.**
- ❖ **Blasting is carried out for the fragmentation of the granite within the project area. Multiple blast holes of 1.0 to 1.5 m depth will be drilled with the help of 32mm drill rod, Jack Hammer and air compressor of 100 cm capacity.**
- ❖ **It is estimated about 250g of explosives per hole is required. About 30-50 holes per blast are proposed. Therefore the requirement of explosive will be about 10kg/ blast.**

#### **Blasting safeguard**

- ❖ **Blasting in the open cast is done only during day time at designated hours.**
- ❖ **Only competent blasters are appointed to handle explosives.**
- ❖ **Explosives are stored in approved and licensed magazine as per explosive Act/ Rules.**
- ❖ **Explosives are brought from magazine to blasting site in licensed explosive van under the care of blaster.**
- ❖ **Sufficient warning signals are given before blasting the holes.**
- ❖ **Guards are posted on all roads and paths at least 250 m distance to stop entrance to the danger zone during the blasting hour.**
- ❖ **Controlled blasting is practiced to control vibrations and flying fragments.**
- ❖ **Optimum charge is used, while blasting near office complex/ infrastructure site.**
- ❖ **Maximum charge per delay is always being less than 10kg to limit the PPV levels within the DGMS standards of 15 mm/sec.**

### **➤ Condition 15)**

A licensed person should supervise/control the blasting operations.

## ***Fifth Compliance Report***

---

### **Compliance**

Licensed person is supervising/controlling the blasting operations. Copy of license of the licensed person supervising/controlling the blasting operations are enclosed as Annexure C2 and C3.

➤ **Condition 16)**

Access roads to the quarry shall be tarred to contain dust emissions that may arise during transportation of materials.

### **Compliance**

Most of the access road area to the quarry is tarred and some portions are constructed with concrete bricks. Roads are well maintained to contain dust emissions that may arise during transportation of materials. The photographs showing the same is given in Annexure D.

➤ **Condition 17)**

Overburden materials should be managed within the site and the old quarries, if any, should be reclaimed and restored.

### **Compliance**

The quantity topsoil and overburden is estimated to be 17306m<sup>3</sup> and 22,539m<sup>3</sup> respectively (Pit 1 and pit 2 together). The excavated top soil is used for plantations and remaining soil is stored separately in a prefixed location. The stored soil is stabilized by planting grasses and herbs on them.

➤ **Condition 18)**

Height of the benches should not exceed 5m and width should not be less than 5m.

### **Compliance**

Quarrying activity in the mine is in the form of benches. The proposed height and width of the bench will attain shortly. The photograph showing the bench type mining is enclosed as Annexure D0.

➤ **Condition 19)**

Mats to reduce fly rock blast to a maximum of 15 PPV should be provided.

## ***Fifth Compliance Report***

---

### **Compliance**

**Different precautions were set down to prevent fly rocks cross the lease area. Blasting during unfavorable weather conditions is avoided. Maintain optimum delay sequence and stem to column ratio to minimize the fly rock distance. Mats to prevent fly rock during blasting will be arranged shortly.**

➤ **Condition 20)**

Mining depth should not exceed beyond 40m, unless otherwise specified or not below the level of nearest stream bed whichever is less.

### **Compliance**

**In the present quarrying project, the exploitation of mineral is from 240-185 m MSL in conceptual phase. Mining depth will not exceed beyond 40m.**

➤ **Condition 22)**

Acoustic enclosures should have been provided to reduce sound amplifications in addition to the provisions of greenbelt and hollow brick envelope for crushers so that the noise level is kept within prescribed standards given by CPCB/KSPCB.

### **Compliance**

**The crusher unit is encircled by green belt and a hollow brick envelope is also constructed around the crusher unit. The photographs showing the same is given in Annexure D1**

➤ **Condition 23)**

The workers on the site should be provided with the required protective equipments such as ear muffs, Helmet, etc.

### **Compliance**

**Workers are using personal protective devices such as earmuffs, ear plugs, helmet etc. at the site. The photographs showing the workers with personal protective devices are enclosed as Annexure D2**

➤ **Condition 24)**

Assurance in the form of affidavit should be given to SEIAA that eco-restoration including the mine closure plan shall be done at the own cost of the project proponent.

## ***Fifth Compliance Report***

---

### **Compliance**

**Assurance in the form of affidavit stating that eco-restoration including the mine closure plan shall be done at the own cost of the project proponent was submitted to SEIAA on March 2014 and the copy of the same is attached at Annexure E.**

➤ **Condition 25)**

Assurance in the form of affidavit should be given to SEIAA that only a maximum of 10 percent of the total mine area shall be retained as water body, which shall be lined properly and further provided with protective wall to prevent accidents.

### **Compliance**

**Assurance in the form of affidavit stating that a maximum of 10 percent of the total mine area will be retained as water body, which will be lined properly and further provided with protective walls to prevent accidents was submitted to SEIAA on March 2014 and the copy of the same is attached at Annexure F.**

➤ **Condition 26)**

Garland drains to be provided in the lower slopes around the core area to channelize storm water.

### **Compliance**

**Storm water from entire project area is channelized in to an abandon excavated pit and stored the storm water in it. During this storage all the Debris/slit in the storm water are sedimented in to the bottom of the pit. Overflow from the storm water collected pit is opened in to Garland drains which entering to the main stream. These garland drains also provided with Check dam model silt trap. Again these drains are entering in to a desiltation tank before inflowing to natural streams. The photographs showing the same is given in Annexure G.**

➤ **Condition 27)**

Debris/ slit traps to be provided to prevent entry of dust and quarry wastes entering the main streams.

### **Compliance**

**Storm water from entire project area is channelized in to an abandon excavated pit and stored the storm water in it. During this storage all the debris/slit in the storm**

## ***Fifth Compliance Report***

---

water are sedimented in to the bottom of the pit. Flooded water from the pit is released only from the top area and the opening is covered by net to trap floating waste. Sediment from the pit is removed and disposed annually. Overflow from the storm water collected pit is opened in to Garland drains which entering to the main stream. These garland drains are also provided with Check dam model silt/debris trap. Again these drains are entering in to a desiltation tank before inflowing to natural streams. This arrangement will prevent the passage of waste from the quarry site to the main streams and the photograph showing the same is enclosed as Annexure G1

### **➤ Condition 28)**

All statutory clearances should have been obtained, as applicable, by the project proponents from the respective competent authorities including that for blasting and storage of explosives.

### **Compliance**

All statutory approvals required for the quarrying activity is obtained for the project. The details regarding the same along with the copy of the statutory approvals are enclosed as Annexure H1, H2 & H3. Details of statutory approvals are given below.

<b>Sl. No.</b>	<b>Annexure</b>	<b>Statutory approvals</b>
1	H1	License to possess: (c) for use, explosives of class1, 2, 3, 4, 5, 6 or 7.
2	H2	Integrated consent to operate issued under Air act, 1981 and Environment act 1986.
3	H3	License from Panchayat

### **➤ Condition 29)**

In case of any change(s) in the scope of the project, the project would require a fresh appraisal by this authority.

### **Compliance**

**Would be complied**

## ***Fifth Compliance Report***

---

### **➤ Condition 30)**

The authority reserves the right to add additional safe guard measures subsequently, if found necessary, and to take action including revoking of the environment clearance under the provisions of the Environment (protection) Act, 1986, to ensure effective implementation of the suggested safeguard measures in a time bound and satisfactory manner.

### **Compliance**

#### **Would be complied**

### **➤ Condition 31)**

The stipulations by Statutory Authorities under different Acts and notifications should be complied with, including the provisions of Water (Prevention and control of pollution) Act, 1974, the Air (Prevention and control of pollution) Act 1981, The Environment (Protection) Act, 1986, the public liability (Insurance) Act, 1991 and EIA notification, 2006.

### **Compliance**

#### **Would be complied**

### **➤ Condition 32)**

The project proponent should advertise in at least two local newspapers widely circulated in the region. One of which shall be in the vernacular language informing that the project has been accorded environmental clearance and copies of clearance letters are available with the Department of Environment and climate change, Govt. of Kerala and may also be seen on the website of the authority at [www.seiaaKerala.org](http://www.seiaaKerala.org). The advertisement should be made within 10 days from the date of receipt of the clearance letter and a copy of the same should be forwarded to the office of this authority as confirmation.

### **Compliance**

**Regarding the accordance of environmental clearance to the quarrying activity was advertised in two local newspapers and the copy of the same was submitted to SEIAA Kerala. The copies of the advertisements are provided at Annexure No. I1 & I2. Details of the news paper advertisements are given below.**

## ***Fifth Compliance Report***

---

<b>Sl. No.</b>	<b>Annexure</b>	<b>Name of the News paper and edition</b>	<b>Dated</b>
1	I1	The New Indian Express	11/11/2013
2	I2	Mathrubhumi	11/11/2013

### **➤ Condition 33)**

A copy of the clearance letter shall be sent by the proponent to concerned Grama Panchayat/District Panchayat/Municipality/Corporation/Urban local Body and also to the local NGO, if any, from whom suggestions / representations, if any, were received while processing the proposal. The clearance letter shall also be put on the website of the company by the proponent.

### **Compliance**

**A copy of the environmental clearance letter was submitted to Ayyampuzha Panchayat office. The acknowledgment received is enclosed as Annexure No. I3. There is no suggestion/representation received so far from anybody. The environmental clearance order is uploaded in the website of the company and it can be seen in the website [www.msand.in](http://www.msand.in)**

### **➤ Condition 34)**

The proponent shall submit six monthly reports on the status of compliance of the stipulated EC conditions including results of monitored data (both in hand copies as well as by e-mail) and upload the status of compliance of the stipulated EC conditions including results of monitored data on their website and shall update the same periodically, it can simultaneously be sent to the respective Regional Office of MoEF, Govt. of India and also the Directorate of Environment and Climate Change, Govt. of Kerala.

### **Compliance**

**Fifth compliance report is being submitted to Department of Environment and Climate change, Govt. of Kerala and Regional Office of MoEF, Govt. of India both in hard copy as well as soft copy (CD).**

## ***Fifth Compliance Report***

---

### **➤ Condition 35)**

The conditions of the environmental clearance should be prominently displayed in a metallic board of 3 ft x 3 ft with green background and yellow letters of Times New Roman font size of not less than 40.

#### **Compliance**

**The conditions of the environmental clearance prominently displayed in a metallic board of 3 ft x 3 ft with green background and yellow letters of Times New Roman font was installed. The photographs showing the metallic board is given in Annexure I4**

### **➤ Condition 36)**

The proponent should provide notarized affidavit (indicating the number and date of Environmental Clearance proceedings) that all the conditions stipulated in the EC shall be scrupulously followed.

#### **Compliance**

**An affidavit stating that all the conditions stipulated in the Environmental clearance will be scrupulously followed was submitted to Department of Environment and climate change on 23.08.2013 and the copy of the same is enclosed as Annexure J.**

### **➤ Condition 37)**

Time schedule for completion of project should be informed to SEIAA.

#### **Compliance**

**The proposed projects consist of an area of 4.8367 hectare and include 2 pits. The expected life of the mine is 3.28 years (Pit 1) and 2 years (Pit 2). Mining was started during 2013 and the closure of the mine will be during 2018-2019.**

**ANNEXURE 1**

**Photographs showing the trucks covered with tarpaulin sheets after loading**

**ANNEXURE 2**

**Photograph showing the relocated Space provided for stacking the overburden and stacked overburden**
